Policy compliance results

ZCA used the Alliance for a Healthier Generation 10-step Checklist. Strengths included policy leadership, wellness goals, Smart Snacks, marketing standards, and triennial assessment procedures. Improvement areas include stakeholder participation, annual public communication, and foods provided but not sold.

Wellness policy goals

1. Nutrition education/promotion
2. Physical activity
3. Other goals for student well-being

All three required goals were met for grades K–6. ZCA provides nutrition education, PE twice weekly, daily recess/activity, morning and after-school activity opportunities, and school-based social-emotional and pastoral support.

Key achievements

1. ZCA met all three required wellness goals.
2. The October 2026 revision strengthened Smart Snacks, marketing, stakeholder participation, and triennial assessment language.
3. ZCA continues annual wellness review and public communication.

Next Steps

Seek Board approval of the October 2026 revisions and strengthen the remaining policy areas identified in this assessment.
